

**I had been in labor for 12 hours when the midwife rotation took place and Nancey became the midwife on call.**

I was overwhelmed, stressed and very worried why my labor was not progressing since this was my second pregnancy. When Nancey arrived and examined me, she was able to let

me know right away as to why my labor was not progressing; I was having back labor. Nancey was very knowledgeable, comforting, respectful of all my wishes of wanting a natural birth. She provided me with the encouragement I needed to endure this excruciating labor pain. Thank you Nancey!!!
