

“Nancey was an invaluable asset throughout the pregnancy and especially during labor and delivery. She was consistently available at each and every step for any questions or concerns we had. She is exceedingly knowledgeable, truly devoted, and most importantly, very caring; you could not ask for more in a midwife! For all 23 hours of chaos between the water bag breaking and delivery, she advocated for my absolute comfort and my aversion to excessive medication, all while educating me on everything happening and helping to make decisions. She is everything you won’t find in any large hospital. She really created a very pleasant experience and made sure my husband and I focused on the joy of it all. She will definitely be delivering our next child!” — GESA
