

**“On August, 17th, 2013, our second son was born via a successful VBAC.** I will never be able to thank Nancey enough for her dedication. Nancey was my advocate, she believed in me, she listened to me and she never gave up. I know that the outcome could have been very different based on a number of variables, but my confidence has been restored. I know that I can have the kind of birth that I want.” — JILL
