

**“I feel so blessed to have had Nancey at my side during my pregnancy, labor and delivery with my daughter.** Feeling safe and comfortable during this time of huge and exciting change is so important, and Nancey immediately put me at ease the day I met her for a prenatal visit. The combination of her nurturing and calming presence with her years of experience and confidence as a midwife were so reassuring — she quickly became my favorite midwife in the practice! When I found out that my labor needed to be induced, I was scared and disappointed. During my labor she was available to me and my labor support person the entire time, and I felt so safe in her care — she brought out my strength and confidence at a time when I didn’t think I had any more in me. I’m so grateful to have had Nancey as part of my childbirth experience!” — KATY
